Art Unit 1711

All remaining rejections and/or objections follow.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. § 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 104-117 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Babrowicz et al. (WO 97/36741).

See the Office action of Paper No. 10 at page 3 line 5 et seq.

Applicants' arguments filed 6-9-03 have been fully considered but they are not deemed to be persuasive.

With regard to Babrowicz et al., applicants argue that Babrowicz requires a polyene in their composition and that

Art Unit 1711

applicants' claims do not contain a diene. With regard to the claims which are now allowed, the Examiner agrees that applicants' claims do not embrace compositions containing a diene. However with regard to the rejected claims, the term "consisting essentially of" only excludes those materials or elements affecting the novel and basic elements of a composition and it is applicants' burden to prove that the novel and basic elements are affected by those elements not explicitly recited. In the instant case applicants' own specification discloses that dienes may or may not be present in applicants' polymeric components and therefore it cannot be said that dienes are excluded by the term "consisting essentially of". While it is true that applicants have presented examples showing that dienes need not be present to form a heat seal, nonetheless there is nothing in applicants' specification to indicate that they cannot be present if desired.

THIS ACTION IS MADE FINAL. Applicants are reminded of the extension of time policy as set forth in 37 C.F.R. § 1.136(a). The practice of automatically extending the shortened statutory period an additional month upon the filing of a timely first response to a final rejection has been discontinued by the Office. See 1021 TMOG 35.

A SHORTENED STATUTORY PERIOD FOR RESPONSE TO THIS FINAL ACTION IS SET TO EXPIRE THREE MONTHS FROM THE DATE OF THIS

ACTION. IN THE EVENT A FIRST RESPONSE IS FILED WITHIN TWO MONTHS OF THE MAILING DATE OF THIS FINAL ACTION AND THE ADVISORY ACTION IS NOT MAILED UNTIL AFTER THE END OF THE THREE-MONTH SHORTENED STATUTORY PERIOD, THEN THE SHORTENED STATUTORY PERIOD WILL EXPIRE ON THE DATE THE ADVISORY ACTION IS MAILED, AND ANY EXTENSION FEE PURSUANT TO 37 C.F.R. § 1.136(a) WILL BE CALCULATED FROM THE MAILING DATE OF THE ADVISORY ACTION. IN NO EVENT WILL THE STATUTORY PERIOD FOR RESPONSE EXPIRE LATER THAN SIX MONTHS FROM THE DATE OF THIS FINAL ACTION.
